PROFESSIONAL PROFILE

As an experienced programmer that has worked in few leading market companies I totally understand how much client needs, analitical knowledge and business contact are important in project development.
I think that my experience combine with studies profile are great combination in solving problems for many challenging markets.

EXPERIENCE

7 MONTHS

SYGNITY S.A.
APRIL 2017 - NOVEMBER 2017

Implementing the new features and bug fixing in Elixir, EuroElixir and NBE(Nowa bankowość elektroniczna) systems. (Used technologies: Spring MVC, Spring Core, JSP, JSF, Hibernate, WebLogic, JBoss, Oracle)

JAVA EE DEVELPOER

8 MONTHS

VOLVO IT
JULY 2016 - MARCH 2017

From my 8-months experience as a Java EE Developer I deeply understand how customer needs and satisfaction from the product are important in today's world. I have developed skills in all java technologies, from creating web applications using full stack web tools to managing projects in Jenkins. Me and my team worked in Agile and Scrum, so I am fully aware how team work can lead to great things. (Used technologies: "pure" java 7, Spring MVC, Spring Core, Spring Data, Spring REST, Hibernate, JBoss Red Hat, Oracle, Jenkins, Jira, JavaScript(Dojo, jquery), CSS 3, HTML 5)

JAVA EE DEVELOPER

2 MONTHS

CAD MECH SP.Z.O.0
JULY 2015 - SEPTEMBER 2015

In my three months experience as a Constructor I have developed skills in terms of modeling things in 3D programs. I was using SolidWorks program to achive goals associated with modeling and making 2D technical documentation of the products. I saw there also how couple of 3D drawers can make great things drawing models previosly created by memebers of our team.

TRAINEE - CONSTRUCTOR

OWN PROJECTS

* Master of science graduate work - Estate market analisis using neural networks,
* Engineer graduate work - Android application for supporting car driver,
* Stock market analizer (using artificial inteligence)(in progress) - python/mongodb

Studies projects:
- System for supporting clients in shopping decisions based on Elsevier articles
- Rink app where I used main Java concurrent concepts.

MY OWN PROJECTS

EDUCATION

16 MONTHS

WROCLAW UNIERSITY OF TECHNOLOGY
IT IN AUTOMATIC
MASTER OF SCIENCE
FEBRUARY 2016 - JUNE 2017

3 YEARS

WROCLAW UNIERSITY OF TECHNOLOGY
MECHANICAL ENGEENERING
ENGEENER
OCTOBER 2012 - DECEMBER 2015

ADDITIONAL INFORMATION

LANGUAGES

ENGLISH

GERMAN

PROFESSIONAL

ELEMENTARY

SKILLS

* Java development(ORM, Spring, Concurrency, networking),
* Android development(Android studio, Gradle, SQLite),
* python(Django, numpy(for machine learning), pandas)
* WEB technologies(HTML5, CSS3, JavaScript(Dojo, JQuery, Angular 2)),
* Oracle, MySql, MongoDB
* JBoss(Red hat), Apache tomcat, WebLogic
* GIT/GitHub, SVN
* JUnit, regressions tests, TDD,
* UML(for creating systems topology),
* Jira, Confluence, Jenkins
* Agile, Scrum
* IDE - Eclipse, Intelij IDEA(prefered), PyCharm
* 3D modeling in Solidworks, Inventor, AutoCad
* Knowlage of:
- materials,
- mechanic,
- electronic

INTERESTS

* sport
* technology
* history
* travel

CHARACTERISTICS

* active,
* elastic,
* communicative,
* loyal
